A LABORATORIES Chicago

for yourself ...

the latest developments in our special and regular laboratory services

at the MIDWINTER MEETING of the

Chicago Dental Society...February 7.8.9.10

We will be at our usual convenient location at the foot of the main stair case in the exhibition hall.

Let us show you case exhibits featuring:

Magnetic Dentures
Hydrocolloid Technique
Tinted Base Dentures

Vitallium Implants
Veri-Thin Vitallium Castings
Precision Attachments

Stressbreakers

Let us show you, too, how Boos extensive and varied experience in producing the more complicated type of restoration can give you plus values in the construction of all your restorations.

We'll be looking forward to seeing you at the Midwinter Meeting.

ASSOCIATION PLAN

Accident and Health Insurance

THIS IS THE ONLY PLAN OF ACCIDENT AND HEALTH INSURANCE ENDORSED OR APPROVED BY THE AMERICAN DENTAL ASSOCIATION

Representation at booth 323, Chicago Dental Society Midwinter meeting, February 7-10, 1954.

BRIEF OUTLINE OF COVERAGE

Accident Benefits

—Full monthly benefit for total disability, from FIRST DAY, limit 60 months. One-half monthly benefit for partial disability, limit 6 months. Limit of time for total and partial combined 60 months.

Sickness Benefits

-Full monthly benefit for total disability commencing with Eighth day of disability, limit 24 months, house confinement not required.

Individual Termination

- The insurance of each insured member will continue in force concurrently with the group policy and will only be terminated by reason of any of the following conditions:
- a. If the group policy is terminated.
- b. If the insured member fails to pay the required premium.
- c. If the insured member ceases to be a member of the American Dental Association.
- d. If the insured member retires or ceases to be actively engaged in the dental profession.

PREMIUM RATES

(Applicable to ages at entry and attained at annual renewal of insurance)

			SEMI-ANNUAL RATES			
Monthly	Accidental	Dismemberment	Ages Up	Ages	Ages	Ages**
Benefits	Death Benefit	Benefits	To 50	50 to 60	60 to 65	65 to 70
\$100.00	\$3,000.00	\$ 5,000.00	\$16.05	\$18.30	\$22.80	\$26.30
\$200.00	3,000.00	10,000.00	30.15	34.65	43.65	50.65
\$300.00	3,000.00	15,000.00	44.25	51.00	64.50	75.00
\$400.00	3,000.00	20,000.00	58.35	67.35	85.35	99.35

Premiums will be billed half-yearly.

The top limit of \$400. monthly will be granted insurable risks, with impaired risks limited to \$200.00 monthly benefit.

**Although the age limit for acceptance of risks is the 70th birthday, once issued, there is no termination age limit for renewal.

If you are not now insured under the ASSOCIATION PLAN, communicate with the Trustee of the Policy Dr. Paul W. Zillmann, 29 Walden Avenue, Buffalo 11, N. Y., or with M. A. Gesner Inc. 150 East Superior St., Chicago 11, Ill.

Issued Exclusively by

NATIONAL CASUALTY COMPANY of Detroit

Through

M. A. GESNER INC.

FULL Mouth Rehabilitations often involve so many types of custom-carved porcelain restorations that the prosthetist finds need of the collaboration of ceramists who are specialists in executing such extensive restorative programs.

Nu-Dent offers an unusually valuable service in such cases. For 29 years Nu-Dent has been recognized as the foremost creator of full mouth rehabilitations and originator of many outstanding technics and restorations used in them.

The greatest of all Nu-Dent contributions to dental ceramics is the Nu-Dent Vacuum Firing Process. It has been called "The Most Revolutionary Advance in Dental Ceramics in 50 Years."

WHETHER your porcelain work consists of one jacket a year or many full mouth rehabilitations, you as a prosthetist are vitally interested in the vastly superior qualities of Nu-Dent Vacuum-Fired Porcelain Restorations. They are

- The only "Vacuum-Fired" Porcelain Restorations fired in a High Vacuum (25 to 27.56 in.).
- The enly "Vacuum-Fired" Porcelain on which independent testing laboratory tests have been published. They show Nu-Dent Vacuum-Fired Porcelain is markedly Stronger, Denser, Harder than conventionally fired porcelain.
- The only "Vacuum-Fired" Porcelain Restorations
 Guaranteed to Match the most Subtle Shades in
 Any Shade Guide, BECAUSE they are carved in a
 Special Porcelain, developed by Nu-Dent for Vacuum-Firing. It is the only porcelain for jackets,
 pontics, etc. in which shade control can be guaranteed under vacuum firing.

Two Strategically Located Studios to Serve You. Write Nearer Studio for Testing Laboratory Report, Descriptive Literature, Illustrated Catalogue, Price List, Mailing Boxes and Pre-Paid Air Mail Labels.

ROBERT F. TUCK Acting General Chairman and Program Chairman 89th Midwinter Meeting, Chicago Dental Society

The Fortnightly REVIEW

THE CHICAGO DENTAL SOCIETY

January 2, 1954

Volume 27 . Number 1

BOB TUCK PRESENTS—

his issue of THE FORTNIGHTLY Review lays before you the wide array of lectures, essays, clinical presentations, exhibits, meetings, receptions, general sessions and entertainment features that make up the 89th Midwinter Meeting of the Chicago Dental Society. When its doors open at the Conrad Hilton Hotel on Sunday morning, February 7, at 10:00 o'clock, a whole year's work and planning will come alive, a whole year's work by the committee chairmen listed at the front of the program and the members of their committees. But it primarily culminates far more than a year's hard work by the Program Committee Chairman and by the General Chairman—this year, for the first time, embodied in one overtaxed individual. Service in the Armed Forces brought about the absence of the General Chairman originally appointed for the Midwinter Meeting and made Dr. Tuck, responsible already for the scientific program of essays and clinics, further responsible for everything else in the meeting from the motion picture program in the Upper Tower Ballroom to the technical exhibits in the Lower Exhibition Hall. Truly a monumental task but one as shown on the subsequent pages that has been excellently discharged. The committees that organized this meeting started their work early last summer, some even before the previous Midwinter Meeting. By midsummer all of them, essay and limited attendance clinics, the various exhibit committees, the motion picture committee and all of the others had met and put their part of the program in progress. There is no shortcut to accomplishment in these affairs, they must be hammered out around the conference table. Throughout all of these dozens of conferences Dr. Tuck has faithfully aided his chairmen.

Someone has said that our Midwinter Meeting is simply a vast amount of details that are taken care of one by one. It is true but not that simple. It is indeed a mass of details and they must be taken care of but this entails foresight, the knowledge of policy and method, planning of time and emphasis and ultimate assignment of duties and functions. Some certain individuals must be delegated to do every individual thing. Certain characters cannot always be relied upon to do these things when they are to be done and the final responsibility always rests upon the General Chairman. Not an easy job, not a happy job, its intervals of honor and enjoyment laced with nagging worries over trifles and interrupted by the umbrageous yelps of toe-trodden brass -but the one job upon whose solid accomplishment the quality of the whole meeting depends. Dr. Tuck has enjoyed the unwavering cooperation of chairmen, vice-chairmen and committee members and the fruit of their labors is here at

(Continued on page 57)

NEWS AND ANNOUNCEMENTS

KENWOOD-HYDE PARK JANUARY MEETING

The Kenwood-Hyde Park Branch of the Chicago Dental Society will hold its next meeting on January 5 at the Sherry Hotel. Dr. Wallace N. Kirby will talk on "Practice Management."

NORTHWEST SIDE BRANCH JANUARY MEETING

The January 12 meeting of the Northwest Side Branch will mark the return to the former well-liked meeting place—Stella's Restaurant.

HYPNODONTISTS' JANUARY MEETING

The Chicago Academy of Hypnodontia will bring A. Geller, M.D. as guest speaker at its January 8 meeting. Dr. Geller's subject will be "Hypnosis in Medical Practice," a résumé of case histories and experiences using hypnosis in a general medical practice.

The regular meeting time has ben advanced from 8:30 to 8:00 p.m. to give time for the question period which follows all sessions.—Orrin Baumgarth, D.D.S., Chairman, Public Relations Committee.

DR. APPLEMAN ACCEPTS POSITION AT NORTHWESTERN

Dr. Robert M. Appleman, Professor of Dental Surgery with Zoller Clinic at the University of Chicago for the past six and one-half years, has left to accept the position of Professor of Prosthetic Dentistry and Head of the Department at Northwestern University Dental School, beginning January 1.

WEST SIDE BRANCH JANUARY MEETING

The West Side Branch will hold its regular monthly meeting on January 12 at the Midwest Hotel. Dr. Henry Glupker will discuss "Habilitation and Rehabilitation of Prosthodontic Patients."

NORTH SUBURBAN BRANCH JANUARY MEETING

The January meeting of the North Suburban Branch of the Chicago Dental Society will be held on the 12th at the Georgian Hotel. Dr. William Heron will be the essayist; his topic, "Normal Suggestion and Hypnosis in Dentistry."

LOYOLA ANNOUNCES POSTGRADUATE PROGRAM

A series of thirteen postgraduate and refresher courses will be offered to dentists of the nation by Loyola University's school of dentistry, starting January 21. The programs are being arranged with limited enrollment in order to make the teaching most effective.

Jan. 21-23: "Theory and Practice of Periodontics" by Dr. Balint J. Orban.

Jan. 27-29: "Analgesia, Anaesthesia for the Dental Patients" by Dr. Max S. Sadove.

Jan. 28-29: "Practical Partial Denture Construction" by Dr. Kenneth P. Austin.

Jan. 27: "Oral Surgery" by Dr. Joseph Kostrubala.

Jan. 25: "Immediate Dentures" by Dr. Emmett Beckley.

Jan. 27: "Drugs the Dentist Uses" by Dr. Gustav W. Rapp.

Jan. 28: "Use of the Extended Cone in Oral Roentgenology" by Dr. Byron J. May.

^{*}In Service

Invitation

I t is a pleasure for the officers of the Chicago Dental Society to invite you to attend our Eighty-ninth Midwinter Meeting and share with us the program set forth on the pages that follow. It represents the efforts of some 330 committeemen, chairmen and officers to bring together a well-diversified program by men and women from all parts of the country.

If each of you who attend will carry back with you something of worth then those who have worked these many months will be well rewarded. Our grateful thanks to them and to each of you for making our Midwinter Meeting what it is.

Elmer Ebert, *President*Gustav W. Solfronk, *Secretary*

REGISTRATION AND CREDENTIALS

HARRY H. KAZEN, Chairman HARRY W. CHRONQUIST, Vice-Chairman

WHO MAY REGISTER

- All regular active, life, retired or honorary members in good standing of the Chicago Dental Society for the year 1954 (dues, if not paid previously, may be paid at the Registration Desk);
- All associate members in good standing of the Chicago Dental Society for the year 1954;
- All members of the Dental Corps of the United States Army, Navy, Public Health Service, or Veterans Administration who are members in good standing of the American Dental Association;
- 4. Other members of the dental profession who are members in good standing of the American Dental Association or a recognized foreign dental society upon payment of a registration fee of \$3.00. Payment of this fee will entitle the registrant to all privileges of the meeting;
- All applicants for membership in the American Dental Association, provided a written statement is presented from the Secretary of the local society in which his application is pending;
- 6. All dental assistants and dental hygienists who are members in good standing of their respective national associations, or who are employed by a member in good standing of the American Dental Association, or a recognized foreign dental society, provided evidence to that effect is presented in writing;
- Laboratory owners and technicians upon presentation of evidence of membership in good standing of a recognized state or national laboratory association, or upon written endorsement of a member of the American Dental Association;
- Dealers' and manufacturers' representatives upon presentation of evidence of membership in good standing of a recognized national dealers' or manufacturers' association;
- 9. All Student Members of the A.D.A. upon presentation of membership card;
- 10. Members of the family of an American Dental Association member upon written endorsement;
- Lay persons upon filing an approved application form, endorsed by an American Dental Association member.

FIRST GENERAL SESSION

The First General Session of the Chicago Dental Society's 89th Midwinter Meeting will take place in the Grand Ballroom of the Conrad Hilton Hotel on the evening of Monday, February 8th, 1954.

The speaker of the evening will be Walter H. Judd, U. S. Representative from

Minnesota, one of the greatest orators in America.

Of all the men occupying elective office in the United States, Congressman Judd is certainly the best informed on two jointly menacing aspects of the world we face today, Communism and the Far East. Of Communism he speaks at first hand—as a medical missionary to China he lived under Communist rule for years and both from past experience and recent travel the Far East is in the immediate forefront of his concern. What makes this knowledge of interest to us is Dr. Judd's ability as a fluent and forthright speaker. His observations are clear and unequivocal—when he is scheduled to speak from the floor of Congress his fellow members crowd the House to hear him as they do for few other speakers.

Walter Judd was born in the small town of Rising City, Nebraska and studied surgery at the Mayo Foundation. He was in China as the head of a hospital when the Japanese invaded and lived there for five months while the Japanese held his city. Returning to the United States he was elected to Congress in 1942 and has been re-elected ever since. His remarks on world conditions today are bound to be worthwhile listening for all of us at the Midwinter Meeting and we are happy to add

him to the long roll of our outstanding "Monday night speakers."

SECOND GENERAL SESSION

The Second General Session of the 89th Midwinter Meeting of the Chicago Dental Society will take place in Private Dining Room Number Two of the Conrad Hilton Hotel at 11:00 a.m. Wednesday, February tenth. It will be the occasion of the presentation of the award to the winner of the Thirteenth Annual Prize Essay Competition sponsored by the Society. The contest was won by Maurice V. Stack of Harvard with a paper on "Organic Constituents of Enamel."

Dr Robert F. Tuck, Acting General Chairman of the Midwinter Meeting, will preside at this General Session and Dr. Elmer Ebert, President of the Chicago Dental

Society, will present the prize award to the winner.

Plan to Visit THE COMMERCIAL EXHIBITS

Exhibit Hours

Sunday, 1 p.m. to 6 p.m.

Monday, Tuesday and Wednesday,
9 a.m. to 6 p.m.

LIMITED ATTENDANCE CLINICS

CLIFFORD K. LOSSMAN, Chairman KERMIT F. KNUDTZON, Vice-Chairman

The Limited Attendance Clinic program will be presented Monday, Tuesday and Wednesday morning and afternoon, February 8, 9 and 10. Each clinic will be of one and one-half hours duration; one session will be presented each morning and two sessions each afternoon.

There will be a charge of \$2.00 per clinic enrollment payable at the time of application. This charge is made to limit applicants to those whose attendance is definite and to partially defray the cost of this program.

It is not necessary to fill out any formal application blank to enroll in one or more clinics. Simply drop a note to the Chicago Dental Society, 30 N. Michigan Ave., specifying the clinic or clinics desired, giving as many selections as possible, both as to choice of clinics and choice of dates. Please refer to the program for the day or days each clinic is to be presented. All applications must be accompanied by remittance of \$2.00 for each clinic for which enrollment is sought. Those desiring to enroll are urged to apply early and to be as brief as is consistent with a full explanation. Applications will be time stamped and considered in the order of receipt. Upon assignment, applicant will be sent cards of admission. Fees paid are not subject to refund except upon cancellation of clinics by the Society.

Applications received on and after January 30, will receive the same consideration as all applications received prior to that date except that, due to limitations of time, applications for clinics in which there are no vacancies will be cancelled automatically. No cards of admission will be mailed after January 29. Cards of admission for clinics in which there are vacancies will be held at the committee headquarters at the Conrad Hilton Hotel for delivery, upon demand, to the applicant. The committee cannot engage in correspondence with applicants whose applications are not in the committee's hands before January 29.

CHILDREN'S DENTISTRY

1. Palatal Appliances in Pedodontia

Presented on Monday at 1:45 and 3:45 p.m. in Room 553 Presented on Tuesday at 10:30 a.m. in Room 553

This clinic is concerned with the most common types of preventive orthodontics seen in children's dentistry; their development and progress. The clinic will be presented describing appliances that may be used for the correction of these developing malocclusions in a manner concomitant with the training of the average practitioner of dentistry using acrylic materials and bent wire.

2. Space Maintainers for Children

ELSIE GERLACH......CHICAGO

Presented on Monday and Tuesday at 10:30 a.m. in Room 534

The clinic will demonstrate the types of space maintainers which can be used by the general practitioner. The materials suitable for these appliances and the construction of the types will be illustrated by means of models and slides. The many opportunities for the use of appliances which will help to prevent malocclusions due to loss of space will be emphasized.

3. The Use of Chrome Steel Crowns in Dentistry for Children

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 507

Clinician will discuss the use of chrome steel making a simple space maintainer, use of chrome steel in fractures of anterior teeth, chrome steel crowns for children, thumb cribs; the adaption and use of chrome steel crowns.

4. Operative and Prosthodontic Technics for Children

RALPH L. IRELAND.....LINCOLN, NEBRASKA

Presented on Monday at 1:45 p.m. in Room 507 Presented on Tuesdlay at 10:30 a.m. in Room 505

The latest operative and prosthodontic technics which have been developed for the treatment of the child's dental needs will be presented. Lantern slides will be used to illustrate all procedures. Time will be allowed to permit questions and answers.

5. The Management of the Child Patient

Presented on Monday, Tuesday and Wednesday at 10:30 a.m. in Room 507

Adequate management of the child patient must be based on understanding of his (and his parent's) attitudes and feelings toward the dentist and the dental situation. The dentist must train himself to recognize each child's individuality and his particular physical, emotional and mental make-up. This results in the ability to provide the adequate approach to bring forth a cooperative patient with high level of self-confidence. The all-important first visit of the child patient will be discussed pointing out the value of slow introduction and orientation. Other factors to be discussed include management of control, severe management problems, attitude of the dentist, separation of child from parents and importance of gestures, uniform voice control and confidence in follow through procedures.

ORTHODONTIA

6. The Plastic Shield for Correction of Malocclusion

WILLIAM S. BRANDHORST......ST. LOUIS, MISSOURI

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 534

Detailed discussion will be given on the construction of the shield along with the way the appliance may be adjusted. The shield finds use by the orthodontist and general practitioner alike, in treating certain types of malocclusion. A short period of discussion will follow several illustrative case reports.

7. Orthodontics in General Practice

T. M. GRABER......CHICAGO

Presented on Monday at 1:45 and 3:45 p.m. in Room 509

There are certain orthodontic procedures that are of considerable value, if employed by the general dentist. Such limited orthodontic tasks as closing diastemas, retracting maxillary anterior teeth, aligning teeth in preparation for restorative work, correcting rotations and eliminating functional disturbances should play an integral role in routine practice. These problems will be discussed and illustrated.

OPERATIVE DENTISTRY

8. Direct Wax Pattern Technic for Cast Gold Inlays

EUGENE BODMER......CHICAGO

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 546

A discussion of the indications and relative merits of the three principal technics for making wax patterns; together with a presentation of a simple, efficient method for making direct wax patterns for all types of cast gold inlays with due consideration of the physical properties of inlay waxes.

9. The Resin Restoration

DREXELL A. BOYD......INDIANAPOLIS, INDIANA

Presented on Monday at 1:30 and 3:30 p.m. in Room 546

The clinician will discuss theory of resin and its application to operative procedures. This will include indications, advantages, contraindications and the various operative procedures and technics used in placing resin restorations.

10. A Technic for Precision Gold Inlays

DUANE CORY......CHICAGO

Presented on Tuesday at 10:30 a.m. in Room 545 Presented on Wednesday at 1:30 and 3:30 p.m. in Room 545

This will be a step by step presentation of a technic which enables the operator to make consistently superior gold inlays by properly utilizing the known physical properties of the materials used.

11. A New Method of Mixing Silicate Cements

ALVIN H. GRUNEWALD.......GREAT LAKES, ILLINOIS

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 522 Presented on Wednesday at 10:30 a.m. in Room 522

The mixing of silicate cements in a closed container under water will be demonstrated and discussed. This new method of mixing silicate cements eliminates the effects of exposing the cement liquid to air. A higher powder-to-liquid ratio is made possible through dissipation of the heat of reaction by the water in which the mix is made. Silicate cement restorations of high compressive strength, low solubility and small shrinkage during setting can be made repeatedly regardless of atmospheric conditions.

12. Special Problems of the Class V Amalgam Restoration

MILES R. MARKLEY..... DENVER, COLORADO

Presented on Monday at 1:30 p.m. in Room 523

Clinic No. 1—(a) The principles of silver amalgam, (b) Technic for Class I and II Restorations, (c) Brief discussion of mechanical condensation (Illustrated with 165 Kodachrome slides).

Presented on Monday at 3:30 p.m. in Room 523

Clinic No. 2—(a) Complex restorations of amalgam, (b) Multiple restorations of amalgam, (c) Brief review of the Class V Amalgam, (d) An amalgam restoration for the distal surfaces of cuspid teeth, (e) Amalgam foundations for cast gold restorations. (Illustrated with about 165 Kodachrome slides.)

13. A Symposium on the Use of Higher Hand Piece Speeds in Restorative Dentistry

ODERICK A. MC EWENATLANTA, GEORGI	A
HEODORE GORDON	0
VILBERT G. GORDON	0
RTHUR M. KRAUSE	0
OBERT M. LAFF	0 .

Presented on Monday at 10:30 a.m. in Room 545 Presented on Tuesday at 1:30 and 5:30 p.m. in Room 545

A method to reduce operating time by the use of cutting instruments rotating at higher speeds with less trauma to patient and operator. Clinical evaluation of equipment modification, lubrication, instrument design and efficiency, as well as control of heat will be demonstrated. This clinic presents a practical method enabling each dentist to triple his R.P.M. speeds using his own equipment.

14. Common Causes for the Failure of Materials in Operative Dentistry

RALPH W. PHILLIPS.......INDIANAPOLIS, INDIANA

Presented on Monday and Tuesday at 10:30 a.m. in Room 546

A high per cent of the clinical failures of restorative materials can be attributed to their improper use. Recent research has presented the dentist with many new materials and technics as well as perfection of older methods. This presentation will evaluate these newer developments, covering such things as: a clinical evaluation of amalgam failures, wax pattern distortion and porosity in dental castings, inaccuracy in hydrocolloid impressions, the properties of self-cured resins with respect to their clinical behavior, evaluation of resin cements, etc. Manipulative factors which govern the clinical success of these materials will be explained.

CROWN AND BRIDGE

15. The Porcelain Jacket Crown on Normal and Abnormal Teeth

(1) Procedures used to facilitate the preparation of malposed and malaligned teeth will be presented, (2) The treatment planning for correction of objectionably spaced teeth by ceramic means, such as wide diastemas and spaces created by migration, (3) A short color motion picture on the preparation of a normal tooth showing instrumentation and finger positions, (4) Porcelain bridgework and porcelain veneer crowns as an aid in esthetics for extensive oral rehabilitation cases.

16. Use of Self-Polymerizing Acrylics for Inlay and Bridge Patterns

WILLIAM B. BURKE......CHICAGO

Presented on Monday at 10:30 a.m. in Room 516 Presented on Tuesday at 1:45 and 3:45 p.m. in Room 516

A demonstration of pressure and brush methods of adapting acrylics as inlay and crown impressions; carving and waxing the patterns using various waxes as "corrections." Investing and finishing the gold castings.

17. An Alginate Impression Technic for Fixed Bridge Abutments

CARYL E. CAMERON......CHICAGO

Presented on Tuesday at 10:30 a.m. in Room 513 Presented on Wednesday at 1:45 and 3:45 p.m. in Room 513

Comparison of the reversible and irreversible hydrocolloids. A technic for those who do not have the hydrocolloid conditioners. Demonstration of ease and simplicity of taking an impression with a minimum of equipment. Models showing accuracy.

Pin-ledge Inlays for Abutments in Anterior Teeth—Two-Appointment Bridge, Use of Hydrocolloid

NORMAN C. CARLSON......LINCOLN, NEBRASKA

Presented on Monday at 1:45 and 3:45 p.m. in Room 513

Kodachrome slides and models will be shown to demonstrate the preparation for pin-ledge inlays for anterior bridge abutments. Will also carry out steps with model demonstrations for two-appointment bridge by use of hydrocolloid method employed by Dr. Morris Thompson and other hydrocolloid workers.

An Impartial Evaluation of Various Abutment Attachments for Fixed, Semi-Fixed and Precision Bridgework

Simplicity of choice consistent with the retentive needs, the mechanical, biological and aesthetic requirements will be thoroughly discussed and an endeavor made to place the choice of abutment attachment in its true perspective and importance in the field of crown and bridge prosthodontics. Clinic supplemented with Kodachrome slides, models and completed cases.

20. Crown and Bridgework using Alginates. Anterior Fixed Bridge using Modified Three Quarter Pin Inlays

ROBERT G. PINKERTON......CHICAGO

Presented on Monday at 10:30 a.m. in Room 513 Presented on Tuesday at 1:45 and 3:45 p.m. in Room 513

Case planning and presentation to patient. Cavity preparation. Method of impressions for accurate pin inlays. How to handle immediate anterior bridge cases.

PERIODONTIA

21. Some Practical Aspects of the Treatment of Periodontal Diseases

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 553

This clinic will deal with the application of basic principles underlying the pathology of periodontal disease to the treatment of common periodontal problems. Diagnosis, determination of prognosis, treatment planning, and methods of treatment will be stressed. Pocket eradication, the treatment of bifurcation involvement, the periodontal abscess, and the infrabony pocket will be considered in detail. The significance of the basic principles of healing in determining the relative merits of various treatment procedures, will be analyzed.

22. The Diagnosis and Correction of Functional Malocclusion

Presented on Monday at 1:45 and 3:45 p.m. in Room 556 Presented on Tuesday at 10:30 a.m. in Room 556

The clinic will consist of a discussion of the dynamic aspects of occlusion, the method of diagnosis of functional malocclusion, the technic of elimination of traumatic forces by occlusal adjustment; introduction of the principle of "Prosthetic Counterpoise": the addition, by prosthetic means, of equivalent forces which act in opposition to traumatic forces in overbite cases.

23. Gingival and Oral Lesions-Differential Diagnosis and Treatment

WILLIAM LESTER MC DANIEL......CHICAGO

Presented on Monday at 10:30 a.m. in Room 553 Presented on Wednesday at 1:45 and 3:45 p.m. in Room 553

The differential diagnosis and treatment of gingival and oral lesions will be presented with Kodachrome slides. Emphasis will be placed on periodontal lesions.

24. The Practice of Periodontics

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 14 Presented on Wednesday at 10:30 a.m. in Room 14

BALINT I. ORBAN.....CHICAGO

The objectives of occlusal adjustment will be presented. The rules will be discussed and the technic demonstrated with models and lantern slides.

JOHN A. KOLLAR, JR.....CHICAGO

The objectives of surgical elimination of the periodontal pocket will be presented. The rules will be discussed and the technic demonstrated with models and lantern slides.

FRANK M. WENTZ......CHICAGO

The objectives of prophylaxis will be presented. The rules will be discussed and the technic demonstrated with models and lantern slides.

Objectives of home care and patient cooperation will be discussed and the technics demonstrated, with models and lantern slides.

ENDODONTIA

25. Endodontics and the General Practitioner

ISRAEL B. BENDER..... PHILADELPHIA, PENNSYLVANIA

Presented on Tuesday at 10:30 a.m. in Room 509 Presented on Wednesday at 10:30 a.m. in Room 513

A technic of procedure demonstrating methods of mechanical instrumentation, antibiotic preparation and sterilization will be presented from the standpoint of the general practitioner.

26. Endodontia in General Practice

> Presented on Monday at 10:30 a.m. in Room 509 Presented on Wednesday at 1:45 and 3:45 p.m. in Room 507

To do good root canal work, one must believe in it, eliminate the guess work, and develop a simple, accurate technic. Clinician will discuss and illustrate with slides and table clinic: (1) with a little help, nature can do wonders; (2) why failures; (3) rapid sterilization of instruments; (4) access to canals; (5) precautionary measures to avoid discolorization; (6) irrigation; (7) comparative effectiveness of various medicaments and antibiotics; (8) mechanical cleansing and filling of canal under accurate measurement control; method and materials; (9) use of cultures; (10) construction of an inexpensive incubator.

27. Root Canal Therapy

A rapid time-saving technic of root canal therapy without benefit of surgery will be demonstrated. The clinic will cover a demonstration of all phases of saving teeth, either with a vital exposed pulp or with a putrescent involvement.

Indications and Technics for Surgical Intervention in Root Canal Therapy—A Means of Improving the Prognosis

HAROLD A. MAXMEN...... DETROIT, MICHIGAN

Presented Monday 1:45 and 3:45 p.m. in Room 512 Presented on Tuesday at 10:30 a.m. in Room 512

The post-resection canal filling technic offers a phase of treating infected pulps in teeth with wide open as well as closed apices, fractured, curved or perforated roots, and other conditions which may not have responded to other methods. Colored movies, slides and charts will be used to present these practical and uncomplicated procedures. The purpose of this clinic is to encourage more men to do more and better root canal therapy.

29. Endodontia for the General Practitioner

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 549

This clinic will include the selection of teeth for endodontic treatment, the preparation treatment and filling of root canals using the silver point, the use of the more common and effective drugs, and the technic for surgical intervention when indicated.

ORAL SURGERY

30. Ostectomy for the Correction of a Mandibular Prognathism

Demonstration of the various methods and procedures in the handling of this deformity in detail by the use of charts, models, x-rays, drawings, etc.

31. Temporomandibular Joint Disturbances: Diagnosis and Treatment

BENJAMIN GANS......CHICAGO

Presented on Monday at 1:30 and 3:30 p.m. in Room 522 Presented on Wednesday at 10:30 a.m. in Room 504

The clinic will include a review of the anatomy and physiology of the temporomandibular joint. We shall discuss the more common disturbances, their differential diagnosis and treatment. This presentation will be augmented with slides.

32. Surgical Removal of the Impacted Mandibular Third Molar

HOWARD E. GILLETTE.....AURORA, ILLINOIS

Presented on Monday at 10:30 a.m. in Room 505A Presented on Tuesday at 1:30 and 3:30 p.m. in Room 507A

(1) Preoperative diagnosis, clinical and radiographic reasons for removal.
(2) Operative technic of atraumatic surgery with detailed description of instruments. Slides and movie. (3) Postoperative treatment, instruction and visits.

33. Simplified Oral Surgery for the Busy Practitioner

JOSEPH H. JOHNSON......TORONTO, CANADA

Presented on Monday and Tuesday at 10:30 a.m. in Room 521

The clinic is organized to appeal to the general practitioner and will deal with the surgical problems that arise every day in their offices. The newer information on premedication and antibiotics will be covered, together with a general review of surgical technics. Antral involvements and the problem of the abnormal maxillary frenum will be included and the clinic will be illustrated with Kodachrome slides.

34. Recognition and Treatment of the Medical-Risk Patient in Oral Surgery Procedures

> Presented on Monday at 1:30 and 3:30 p.m. in Room 507A Presented on Wednesday at 10:30 a.m. in Room 507A

One third of all the patients coming into the dental office are suffering from some form of systemic disease. Mismanagement in many instances may not only give rise to serious complications but may even result in fatality. It is thus imperative for the dentist to have an understanding of the necessary precautions to be taken in the treatment of such patients. First, however, it is even more important for the dentist to be able to recognize the presence of systemic disease so that he does not make the serious mistake of handling "medical-risk" patients in the routine manner. With these things in mind the discussion, illustrated with Kodachrome slides, will include the following: (1) signs and symptoms of various diseases which can be recognized by the general practitioner; (2) simple office tests of value in diagnosis; (3) pre and postoperative considerations; and (4) selection of oral surgery procedures and anesthetic agents in medical-risk patients.

35. Handling of Surgical Problems Encountered in Everyday Practice

VIGGO B. SORENSEN......CHICAGO

Presented on Monday at 1:30 and 3:30 p.m. in Room 521 Presented on Wednesday at 10:30 a.m. in Room 521

The presentation will cover a thorough discussion of common oral surgical procedures and will be illustrated with Kodachrome slides. The material covered will include removal of roots, cysts, biopsies, surgical preparation for immediate dentures, alveolectomies, etc.

PHOTOGRAPHY

36. Dental Stereography

JACKSON W. BATES......OVID, MICHIGAN

Presented on Monday at 1:45 and 3:45 p.m. in Room 504 Presented on Tuesday at 10:30 a.m. in Room 504

The various methods of taking and using close up stereography in the different fields of dentistry will be discussed and illustrated by colored stereo slides. The technic used in mounting slides and of transmitting the third dimensional effect to the viewing audience will be demonstrated. 3-D viewing glasses will be furnished.

37. Color Photography of the Intraoral Area

JOHN E. BLICKENSTAFF......CHICAGO

Presented on Monday at 10:30 a.m. in Room 504 Presented on Tuesday at 1:45 and 3:45 p.m. in Room 504

A discussion of available equipment that is practical, efficient and easy to use. An explanation as to the adjustment and use of cameras, supplementary lenses, extension tubes and lighting equipment. A paper will be distributed for future reference and guidance. The major portion of the period will be devoted to questions and analysis of personal equipment and problems.

FULL DENTURES

38. The Method which should be Used in Choosing the Occlusal Form of a Posterior Tooth for Each Individual Denture Patient

THEODORE A. BODINE.....AKRON, OHIO

Presented on Monday at 1:30 and 3:30 p.m. in Room 505

The presentation will explain the reasons why it is not possible to use one occlusal form of posterior tooth exclusively in the construction of full dentures. The method used for the selection of the individual posterior tooth form will be explained.

39. Basic Anatomic Factors of Jaw Position

RALPH H. BOOS.......MINNEAPOLIS, MINNESOTA
Presented on Wednesday at 1:30 and 3:30 p.m. in Room 303A

Various bite registration technics will be considered, including the controlling anatomical structures. A technic will be presented which includes conditioning the patient and the registration of the jaw position to provide vertical, centric and horizontal rotation records of the registration. The material is relatively simple and practical for all dental offices. It provides a basic registration for the various phases of dentistry such as prosthetics, periodontia, crown and bridgework, etc. Temporomandibular dysfunction of dental origin will also be considered.

40. Basic Principles of Full Denture Construction

This procedure will deal with following basic principles: (1) non-pressure impressions; (2) registration of positive centric; (3) flexibility of the human condylar mechanism within limits prescribed by balanced articulation; (4) establishing flat plane of occlusion parallel to a similar condyle path; (5) orientation of this plane at correct distance from centers of rotation. A colored motion picture will show the entire procedure. This procedure is simple but most accurate. Chair time is conserved throughout and return visits are reduced to an absolute minimum. A table presentation will show the various steps in the procedure and the importance of mounting casts on articulator to centric will be stressed. A problem case will also be demonstrated. Time will be given to discuss all phases of laboratory procedure including anatomical wax up and color tone.

41. An Immediate Denture Service that Minimizes Surgery

DENTURE RESEARCH GROUP OF CHICAGO FRANK A. FARRELL CHESTER A. FRANKEWICZ A. J. KASTEL RAYMOND MARGUS W. E. SPECTER, EAST CHICAGO, INDIANA

> Presented on Monday at 1:30 and 3:30 p.m. in Room 505A Presented on Tuesday at 10:30 a.m. in Room 505A

A part of the psychosomatic principles of denture practice that will explain the following with the aid of movies, slides and practical cases. (1) the indications for flangeless dentures (maxillary or mandibular), (2) why try-ins are not necessary, (3) the importance of a flat plane of occlusion, (4) indications for palateless (roofless) maxillary dentures, (5) the importance of patient education and guidance, as well as need for psychosomatic balance by both patient and dentist from the first appointment through impressions, centric registration, articulation to delivery and adjustment of the finished case.

42. Impressions for Full Dentures

HARRY E. DENEN......CHELSEA, MASSACHUSETTS

Presented on Monday and Tuesday at 10:30 a.m. in Room 507A

A common sense clinical analysis of the impression, showing the necessity for an understanding relationship between diagnosis and treatment planning and the making of the impression. Various types of impression procedure will be discussed to show that each may have creditable value performing a specific mission. Technic will be portrayed as it applies.

43. Impression Procedures for Complete Dentures

FRANK C. HUGHES......INDIANAPOLIS, INDIANA

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 505

This clinic will demonstrate the variable technics and materials suggested for use in meeting the requirements of individual cases. A technic for the rapid fabrication of individual trays will be presented together with suggestions for the use of both pressure and non-pressure technics as indicated by diagnostic findings.

44. Characterization of Dentures

HOBART H. PROCTOR......DENVER, COLORADO

Presented on Tuesday at 1:30 and 3:30 p.m. in Room 505

The clinic will be presented in detail step by step, the selection of colors from oral tissues and their incorporation into full dentures. This technic permits any variation according to the patient. It is permanent and cannot be destroyed in processing, wearing or finishing of the denture. It is not complicated nor time consuming. This process is comparable to any high type of dental restoration.

45. Balanced Occlusion Plus Ideal Esthetics and Phonetics

GILBERT WATKINS STUDY CLUB

> Presented on Tuesday at 1:30 and 3:30 p.m. in Room 505A Presented on Wednesday at 10:30 a.m. in Room 505A

Presenting step by step (with models) procedure from impression to finished dentures ending with functional balance, ideal esthetics and phonetics. We will cover such important points as vertical dimension, occlusal plane, correct facial contours, centric relation, technic of coloring denture material, latest scientific facts in regard to where the teeth should be set.

PARTIAL DENTURES

46. Hydrocolloi echnics

Presented on Monday at 1:45 and 3:45 p.m. in Room 547

This clinic will show the procedures for taking hydrocolloid impressions and developing the dies and models necessary to make inlays and fixed bridgework. These procedures have been routinely used in the office of the clinicians for ten years. There will also be discussion of the important factors in handling hydrocolloid impression materials before and after taking the impressions.

47. Crown and Bridge Prosthesis with the Full-Coverage Abutment and the Precision Attachment

I. FRANKLIN MILLER......PITTSBURGH, PENNSYLVANIA

Presented on Monday, Tuesday and Wednesday at 10:30 a.m. in Room 547

A simplified approach to extensive restorative dentistry with emphasis on the use of "full coverage" crowns for mouth rehabilitation, abutment preparations, correction by use of prosthetics, copper plating of dies, fabrication of veneer crowns will be shown. Indication and construction of fixed bridgework as well as the use of precision attachment in partial denture prosthesis and all steps from impression to delivery of finished case will be discussed.

48. Designs for Partial Denture Retainers

Presented on Wednesday at 1:45 p.m. in Room 516

The Brush Technic for the Fabrication of Partial Denture Saddles

CHESTER K. PERRY......DETROIT, MICHIGAN

Presented on Wednesday at 3:45 p.m. in Room 516

The ideal retainer that is used for stabilization of the partial denture restoration is one in which the undue stress on the abutment teeth is reduced to a minimum. Today we are able to vary the design of retainers to protect the abutment teeth against the increased masticatory load. In finality, the retainers are only a part of the whole design for the restoration. They must function to stabilize the restoration itself as well as to have a protective stabilizing effect upon the remaining dentition, particularly the abutment teeth.

49. The Spiro Technic of Alginate-Hydrocolloid Impression

HARRY SPIRO.......CHICAGO

Presented on Tuesday at 1:45 and 3:45 p.m. in Room 547 Presented on Wednesday at 10:30 a.m. in Room 523

Just as an inlay can be no better than the pattern from which it is made, in the same sense, the fit of an indirectly constructed bridge or partial denture can be no better than the accuracy of the impression. In this presentation the clinician will explain the causes of common impression defects, such as, deficient impressions, rough impressions, torn impressions, trapped air in impressions, lack of detail in impressions, and distorted impressions. Clinician will demonstrate his technic which obviates all of the above difficulties simply and easily. This method produces impressions of greater accuracy than was possible formerly, and it completely eliminates impression retakes because, each and every impression attempt results in a completely detailed and accurate impression. Session will close with a question and answer period.

50. Relining Mandibular Partial Dentures

VICTOR L. STEFFEL.....COLUMBUS, OHIO

Presented on Monday at 1:45 and 3:45 p.m. in Room 534

The clinic will provide an atmosphere for a more intimate discussion of relining problems. Here will be covered materials used, types of removable partials most often needing relining, preparation of the denture, methods of procedure, and the favorable end results of the meticulous, painstaking relining operation. No denture ever fits so well that it cannot be improved by the correct and careful relining technic for that specific problem. Clinic will be illustrated by Kodachrome slides.

PRACTICE ADMINISTRATION

51. The Listening Chair

HOLLIS A. ASKEY.....LINCOLN, NEBRASKA

Presented on Monday at 1:30 and 3:30 p.m. in Room 516

Why it is better to sit down for all consultations. How to help people to select good dentistry. How to make and present good study models. How to improve yourself through reading the right books. "Take home" material to remind patients of your thoroughness.

52. A New Approach to the Problem of Case Presentation

CECIL H. BLISS......sioux city, Iowa

Presented on Monday and Tuesday at 10:30 a.m. in Room 523

An attempt will be made to reduce the art of case presentation to fundamental principles. It will be shown how these principles, taken from the field of psychology, can be used in perfecting a technic that meets the requirements of present day practice. This clinic is arranged particularly for the recent graduates who are at a loss as to how best to proceed in presenting dentistry to patients.

53. Building or Rebuilding a Proud Practice

J. C. ALMY HARDING......SAN DIEGO, CALIFORNIA

Presented on Wednesday at 1:30 and 3:30 p.m. in Room 523

Clinic will be an elaboration of the essay on the same title. Demonstration of office routines in examining, estimating, contracting, performing, and practice enrichment. Collection problems and how to avoid having them.

54. Fundamental Rules on How to Manage a Dental Practice

JAMES F. PLANTS......EVANSTON, ILLINOIS

Presented on Monday at 1:30 p.m. in Room 545
Presented on Wednesday at 1:30 and 3:30 p.m. in Room 546

This presentation is designed to help the busy general practitioner. Some of the subjects to be covered are: the office set-up; type of employees and their duties; how to determine the cost of operation and proper fees; how to produce more high quality dentistry with less effort on the dentist's part and make his work easier and more enjoyable.

55. Office Administration

ALFRED J. PEETZ......MADISON, WISCONSIN

Presented Tuesday at 1:30 and 3:30 p.m. in Room 523

Clinic will cover practical methods to establish better relationship between dentist and patients, a better understanding of the needs and wants of the patient when rehabilitating a complete dentition through a workable presentation.

fashion show and luncheon

for the ladies

Tuesday, February ninth

12:00 noon

BOULEVARD ROOM
Conrad Hilton Hotel

Fashion Show by Marshall Field & Co.

Tickets \$4.00

SPECIAL DEMONSTRATION CLINICS

The demonstration clinics listed below will present the latest and best technics in the quick repair of broken dentures by the use of cold cure acrylics shown by clinicians from the dental schools of Chicago.

All demonstrations will be in Private Dining Room Six on the Third Floor of the Conrad Hilton Hotel.

Monday, February 8, 2:00-5:00 p.m. Clinicians from Northwestern University Dental School Under the direction of Robert Pearson

Tuesday, February 9, 9:00-12:00 a.m. Clinicians from the University of Illinois School of Dentistry Under the direction of Dale M. Lipe

Wednesday, February 10, 2:00-5:00 p.m. Clinicians from the Loyola University School of Dentistry Under the direction of Rinert J. Gerhard

ESSAY PROGRAM

W.	G.	F.	SCHMIDT.	Chairman
44.	U.	F.	SCHMIDT.	Chairman

hand but by creating the atmosphere of a well-planned division of labor and the confidence of a correlated integrity of scope the General Chairman has furnished the pivotal balance for the whole machine of production.

Do not forget the time and the date ten a.m. on the 7th of February. That is Sunday and the exhibits will open in the afternoon at one o'clock. The main program of essays, limited attendance clinics, table clinics, scientific exhibits, health and educational exhibits, motion pictures, receptions, meetings and parties starts on Monday. The Ladies' Luncheon with a Fashion Show from Marshall Field's is in the Boulevard Room on Tuesday noon and the Annual Dinner-Dance with a floor show headed by Georgie Gobel is in the Grand Ballroom on Wednesday night. See you there!

Rocky Mountain offers you NEW OPPORTUNITIES in DENTISTRY for CHILDREN

By treating more children you realize income from a vast new market and you perform a vital health service

Today there are over 31,000,000 children under the age of 12 in America. This year approximately 4,000,000 new babies will join our population. This large and expanding population group demands countless commodities and services, and dentistry for children is becoming a most essential requirement. To meet this demand you need modern materials and techniques to operate efficiently and economically. Rocky Mountain's new specialties meet these requirements, making it possible to care for more children needing your help.

TRU-FORM PRIMARY CROWNS. Authorities estimate that 244,000,000 fillings would be required to restore mouth health to American children of 6-18. Previously little work was done with primary teeth, because conventional materials made care difficult and unprofitable. Now, with Rocky Mountain's new crowns, you can successfully restore badly decayed children's teeth in one sitting at a great saving to you and your patient. Tru-Form Primary Crowns, \$.30 each. Introductory assortment of 100 \$30.00.

TRU-CHROME SPACE MAINTAINERS. Many serious orthodontic problems are caused by the premature loss of primary teeth and the closing of space. Making a space maintainer is a simple operation with Rocky Mountain prefabricated bands and space maintainers. Rocky Mountain Space Maintainer Kit, \$5,25.

TRU-FORM PERMANENT ANTERIOR CROWNS FOR FRACTURES. A fractured tooth is a sick tooth and should be treated as any broken bone. These new crowns provide positive treatment for such emergencies. Other uses for open face crowns, matrices for plastic filling materials, correcting lacked anteriors. Rocky Mountain Emergency Kit, \$5.40.

The new materials and techniques help promote satisfaction and respect, and they are great practice builders, because the child of today is your patient of tomorrow. However, like anything fine in the profession, these new materials require definite operating technique.

For information contact your dealer or check the technique literature desired and mail the coupon.

Nature, in her most perfect form of design, achieves an admired symmetry, a harmony of components with their whole, and a resulting natural beauty which, though often imitated, is rarely equalled, but never surpassed.

Trubyte Bioform Teeth follow Nature's own principles of design. The forms of Trubyte Bioform Teeth are the result of careful and prolonged study of thousands of extracted natural teeth, hundreds of skulls with good dentition and hundreds of patients. They are truly representative of the appearance of beautiful natural teeth. Each form has been carefully selected for its size and proportions, approximate outline form and pleasing labial characteristics. Labial markings vary in type from one form to another. No two forms in any classification are identical even in outline. No pattern has been followed beyond that provided by Nature.

Trubyte Bioform Teeth are in harmony with all three dimensions of the face—outline form, profile and cheek planes. They form the basis for a system of tooth selection which assures an esthetic result never before attainable. They enable every dentist to attain a new degree of excellence in his prosthetic work.

TRUBYTE Bioform® TEETH

A Product of The Dentists' Supply Co. of N. Y., York, Pa.

IS A MATTER OF RECORD

The records of Dentists, Laboratories, and Dealers, everywhere, and through generation after generation, pay tribute to the performance of Dee Gold.

DEE GOLDS owe this longstanding nation-wide acceptance to the science of their compounding, to the unfailing dependability of their quality, and to their proved high performance in every phase of modern dentistry requiring a supporting element of metal.

The family of DEE GOLDS is complete to the extent that you may choose a type specifically compounded to meet every individual requirement . . . including that of economy.
